The objective of this study, therefore, is to construct a model for the management of ES information in Brazil.

The results revealed that in 29 nations studies have been developed to systematize sport information and to know the elements that interfere in the success of the ES.

The study of the scope of these elements resulted in the selection of ten dimensions for collecting and cataloging Brazilian ES information in a MySQL Database (DB), modeled with the objective of allowing the articulation between the dimensions. The elimination of redundancies and the construction of the ERM, the standardization and categorization of the terms allowed the construction of an information management model of the ES that allows continuous updating dimensions and information mapped, composed of eight dimensions: Financial Resources; Sports Infrastructure; Sports Materials; Entities and Governance; Athletes and Sport Professionals; Events and Sport Results; Science and Technology; Legislation.

The model uses the principles of Business Intelligence (BI) and a database that can be continuously adapted to different factors, contexts, and sports.

By inserting business intelligence into sports management, this work provides the most important information for decision-making by managers, can qualify the policies and contribute to efficient communication between different sports entities...
