What PC specifications do we need to play COD Warzone 2 at 1080p with medium-like graphics? Depends on £ what kind of framerate you're looking for, but for ~60 FPS. Something like £ an 8th-10th gen i5 or Zen 2 £ (or better) Ryzen 5 , 16GB RAM, and a GTX 1650S or Radeon RX 570 or better should do nicely.
