

80/20 Rule

The 80/20 rule, also known as the Pareto principle or the 80/20 rule, is a principle that states that 80% of the results come from 20% of the causes (generally). This principle is applicable to many areas of life and human activities, such as business, economics, and social sciences.

The 80/20 rule is a principle that states that 80% of the results come from 20% of the causes (generally). This principle is applicable to many areas of life and human activities, such as business, economics, and social sciences.

In summary, the 80/20 rule is a principle that states that 80% of the results come from 20% of the causes (generally). This principle is applicable to many areas of life and human activities, such as business, economics, and social sciences.

For example, a project manager can use the 80/20 rule to identify the tasks that contribute most to project delays and prioritize those tasks before focusing on other activities. Similarly, a marketing specialist can use the 80/20 rule to identify the channels that generate the most traffic to their website and focus their marketing efforts on those channels.

In summary, the 80/20 rule is a valuable tool for identifying and prioritizing the most important factors that cause a specific result.

A person who travels to space is called an astronaut.

Who travels to space is called an astronaut.

As: - BYJU'S byjus : question ; , com answer ; a/Percentage of travel to space is called an astronaut.
