Volatility averages around 15%, is often within a r

ange of 😉10-20%😉, and rises and falls over time. More rec

ently, volatility has risen off historical lows, but has not spiked outside of t

he normal range.

What is Volatility and is it Normal? - Foster & Motley

In the stock market context, rapid price fluctuation in ei

ther direction is considered as volatility. Therefore, a high standard deviation

value means prices can dynamically rise or fall and vice versa. In most cases,

a surge or dive of 1% in market indexes classifies it a

s a volatile market.
