– hwc kCrYT– style=– padding-botto
m:12px; padding-top:0px– Running a VM on a NAS takes a lot of re
sources so you would need to choose one with good processor and RAM

. An alternative (if you want to run a virtualized Linux app) is docker. both
Qnap and Synology have Docker support which takes very little system resources .

The baseline functionality of network-attached storage dev
ices has broadened to support virtualization. High-end NAS products

might also support data deduplication, flash storage, multiprotocol access and
data replication.
