<p></p><p>Football corners predictions is one of the fairly new tips offered by tipsters and by us. Some say it's luck 🌜 predicting corners in a football game, but we at AFootballReport find in corners very profitable markets especially in live events 🌜 when odds go very high as the game evolves.So how do we predict corners? Of course as any other football 🌜 prediction and corners are related to a number of pre-match and team factors. First of all we should see the 🌜 type of game we're looking for or the type of game we want to predict. Is it a game with 🌜 a strong favorite or just two equally strengthen teams that play. If it's a game with a strong favorite probably 🌜 we should pay attention to the corners race predictions as strong favorites always keep the ball in possession more than 🌜 the other teams and create more chances as they push forward almost during the whole game. Keep in mind in 🌜 live events that if the score is in favor of the favorite team then this team would not be so 🌜 motivated to create chances and would probably win less corners than in a draw event or from behind.</p>
<p>Second thing we 🌜 should use when making our corners tips is to see the teams   lineups and tactic for the upcoming game. Target 🌜 teams with more offensive tactics and teams that use wingers heavily in their attacks. For example, some good wingers for 🌜 the home team could easily produce more than 10-20 crosses in the penalty area which very often defenders clear in 🌜 corners.</p>
<p>Corners in the late stage of the game are more likely to happen than in the early minutes. Usually teams 🌜 are very careful in the opening minutes of a football game and they try to enter the game more passively 🌜 than aggressively. As the game continues depending on whether a team is losing or winning the game is leading to 🌜 pushing forward and sending more players to attack or defend. This leads to significantly increasing the number of corners in 🌜 the last minutes and that is what we want when predicting corners.</p>
<p>Spot derby games. Derby games are always poor in 🌜 goals, but
